Research Papers

A dynamic hillslope response model in a geomorphology based rainfall–runoff model
Y. Gyasi-Agyei, F.P. de Troch and P.A. Troch 1
Diffusion of floodwaves
P. Rutschmann and W.H. Hager 19
Capillary pressure–saturation relations in porous media including the effect of wettability
W.A. Moseley and V.K. Dhir 33
Simulation of the Kenyan longest dry and wet spells and the largest rain-sums using a Markov model
T.C. Sharma 55
A new convergence criterion for the modified Picard iteration method to solve the variably saturated flow equation
K. Huang, B.P. Mohanty and M.Th. van Genuchten 69
Gas phase diffusion coefficient in cemented porous media
B. Elberling 93
Salinization owing to evaporation from bare-soil surfaces and its influences on the evaporation
E. Shimojima, R. Yoshioka and I. Tamagawa 109
Variation in stream water chemistry and hydrograph separation in a small drainage basin
D. Caissie, T.L. Pollock and R.A. Cunjak 137
Hydroclimatological and geomorphic controls on the timing and spatial variability of floods in New England, USA
F.J. Magilligan and B.E. Graber 159
Multivariate statistical analysis of arsenic and selenium concentrations in groundwaters from south–central Nevada and Death Valley, California
K.H. Johannesson, K.J. Stetzenbach, D.K. Kreamer and V.F. Hodge 181
Isotopic imaging of surface water/groundwater interactions, Sacramento Valley, California
R.E. Criss and M.L. Davisson 205
Geostatistical analysis of the Borden aquifer hydraulic conductivity field
M.A. Turcke and B.H. Kueper 223
Daytime evaporation and the self-preservation of the evaporative fraction and the Bowen ratio
R. Crago and W. Brutsaert 241
Ecoregions for describing water quality patterns in Tamiraparani basin, South India
S. Ravichandran, R. Ramanibai and N.V. Pundarikanthan 257
Monthly hydrologic data generation by disaggregation
S. Maheepala and B.J.C. Perera 277
The effects of afforestation and deforestation on water yields
V. Sahin and M.J. Hall 293
Modelling the time evolution of water-quality parameters in a river: Yarra River, Australia
S. Sokolov and K.P. Black 311
Use of Green-Ampt model for analyzing one-dimensional convective transport in unsaturated soils
R.S. Govindaraju, M.L. Kavvas, S.E. Jones and D.E. Rolston 337
Unsteady soil erosion model, analytical solutions and comparison with experimental results
G.C. Sander, P.B. Hairsine, C.W. Rose, D. Cassidy, J.-Y. Parlange, W.L. Hogarth and I.G. Lisle 351

Ponding time and infiltration capacity variation during steady rainfall
M.H. Diskin and N. Nazimov 369
A dynamic factor model for multivariate water quality time series with trends
S. Zou and Y.-S. Yu 381
